

A2B SORTER

Our A2B Sorter is an automated and sophisticated system

used to sort Garments on Hangers (GOH). It has been designed to reach an outstanding mechanical performance with unmatched efficiency and precision.

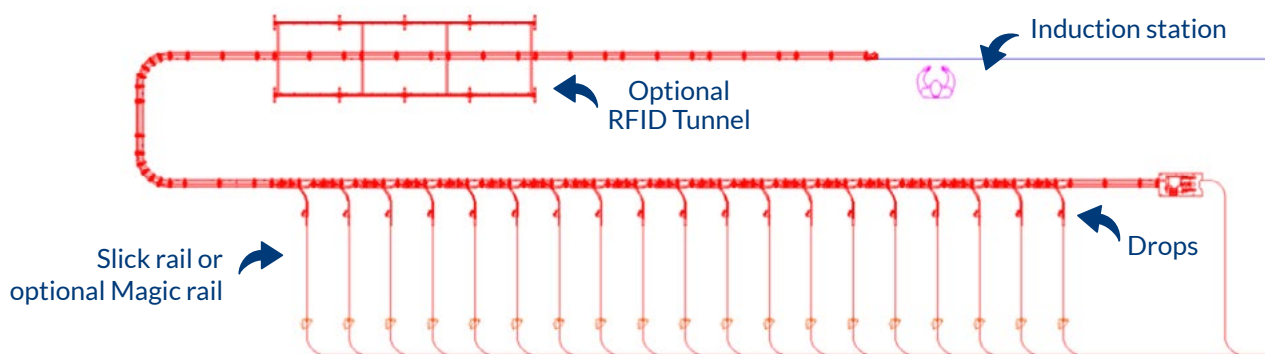

System

- > Automated GOH sorting system
- > Scalable to any desired size
- > Most affordable and simplest system on the market
- > Can be implemented in industrial laundries, uniform rental companies, distribution centers, warehouses and e-comm distributors
- > Minimal maintenance required

Tech Specs

- > Sorting speeds of up to 6,200 GOH/hour
- > Reads UHF RFID, QR code or barcode tags
- > GOH sorted using Planiform's proprietary mathematical algorithm
- > Accepts unlimited sorting criteria
- > Can accommodate 1 sort pass or 2 sort passes
- > Compatible with any computer database

Add-ons

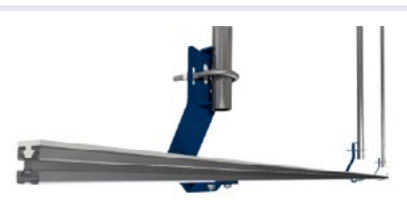

RFID Tunnel

for a fast and efficient reading

Magic Rail

for easy pushing of GOH on drop lines

Benefits

No longer rely on manual sorting by employees that know the sorting criteria by heart

Reduces sorting labor costs providing fast return on investment (ROI)

Eliminate human errors

Ergonomic

Low maintenance
